PROJECTS

Personal Website - heavenlee.xyz

My own personal website which I built using the Bootstrap framework. Designed to be responsive on all devices. Registered domain name and configured DNS. Setup hosting with Github Pages.
*Built with **HTML**, **CSS**, **jQuery**, and **Bootstrap**.*

HeavenLee Themes - heavenleethemes.tumblr.com

I built custom themes for Tumblr. My themes feature customizable options which lets the user add a more personal touch to the layout and design. I use Github for version control and documentation for my themes.
*Built with **HTML**, **CSS**, and **jQuery**.*
